

***New Hope Construction's  
Seniors at Home Village of Dunlap***

**Four more senior families will soon be in new homes-of-their-own in *the Seniors at Home Village* in Dunlap, TN. Construction started this week for the two new townhomes that will join the other ten townhomes that have been completed since the groundbreaking in July of 2008. All sixteen townhomes of Phase ONE are planned to be finished by late spring.**

**Phase TWO will have fourteen more townhomes. Construction is planned to start on these in late summer, and applications are now being accepted for Phase TWO.**

From the  
President

Last month saw the passing of Millard Fuller, the founder of *Habitat for Humanity and the Fuller Center for Housing* whose admirable efforts around the world have housed thousands of families in need of a decent place to live. The need continues. As we approach the busy Spring building season, although we find ourselves in a slow economy, the housing needs of families continue to grow.

*New Hope Construction's mission* is to help make affordable housing possible for needy families. We continue to partner with *Habitat for Humanity*, churches, and other nonprofit organizations in accomplishing our mission.

*-W. Russell Meade*

**Habitat for Humanity**

Lawrenceburg, TN

*Lawrence County Habitat for Humanity* in Lawrenceburg, TN has built nine homes. Each of those houses has been a *New Hope Construction, Inc.* house.

The house completed in December of 2008 was the NHC house plan, the *Naomi*. This was well chosen by our homeowner. It fit the lot perfectly and complemented the neighborhood.

We hope to build another New Hope house for another qualified family later this year.

-submitted by Nelta McAdams

The *New Hope Construction* package was delivered mid-October and construction was started that day. This project went together rapidly, due to a dedicated core group of volunteers. The home was a joint venture between the *Lawrence County Habitat for Humanity* and the *Lawrenceburg Rotary Club*.

Hendersonville, TN  
February 20, 2009

*New Hope Construction, Inc.* is proud to partner with the *Sumner County Habitat for Humanity* in their Womens Build. Not only will *Sumner County HFH* be building the NHC *New Hope II* house, but we are so excited to announce that the female NHC employees will be rolling up their sleeves and helping to build it.

**"Wings of Eagles Healthy Living"**

The *New Hope Construction* team received a great gift from the "*Wings of Eagles Healthy Living*" nonprofit organization on February 5th. With a mission to educate people everywhere on healthy practices within the home, the Executive Director, Jeannetta Hitt, who is also a Healthy Interior Designer, and Vicki Warren, the WEHL Program Director, who is also an Electrical Engineer and Building Biologist, presented their program on awareness of the electromagnetic and environmental hazards within the home.

As NHC becomes more concerned about environmental dangers and strives to incorporate "green" practices in construction with the use of healthy materials and avoidance of potentially hazardous VOC solvents, "*Wings of Eagles Healthy Living*" is a friend from whose vast knowledge we hope to draw and continually improve the construction of more healthy housing.
